## Keytime Release Version 24.3

### **An update on IRIS Keytime Payroll**

From 5 April 2025, IRIS Keytime Payroll will no longer be available for processing payrolls.

Our final legislative release will allow you to generate P60s for the 2024/2025 tax year only. However, this release will not be compliant for payroll processing or HMRC submissions for the 2025/2026 tax year onwards.

As IRIS Keytime Payroll is no longer a supported product, we recommend upgrading to our next-generation, cloud-based software [Staffology Payroll](#).

For information on why to migrate from IRIS Keytime to Staffology Payroll, visit our [website](#). For step-by-step migration guidance, visit our [Help Centre](#).
